OMRI
LISTED
For Organic Use

Consumers associate organic food with healthy produce, free of chemicals and artificial ingredients and grown using sustainable and ecologically sound practices. The consequence has been a steady increase in consumer demand for organic products, including organic coffee.

What is Organic?

Biological Farmers of Australia (BFA) says 'organic' products are grown and processed without the use of synthetic chemicals or fertilisers or genetically modified organisms (GMO).

Biological Farmers of Australia, AgricQuality New Zealand, United States Department of Agriculture (USDA) and the Canadian General Standards Board all agree that an 'organic' product is one produced under a system that satisfies their respective production and processing standards.

So what are Approved Cleaners?

Biological Farmers of Australia (BFA) specifically registers products that have been proven to conform to their Organic Standard and are given an 'Allowed Input' certification and carry the BFA logo.

The **Organic Materials Review Institute (OMRI)** in the US publishes a Brand Name Products List of products that have been reviewed and comply with the USDA NOP (National Organic Program). Only those products that have passed the OMRI review may display the 'OMRI Listed' seal on labels and in advertising.

Things to Consider...

- Are the organic beans ground in a grinder that is used to grind non-organic beans?
- If so, is the grinder cleaned in compliance with the organic standards?
- Are the organic ground beans percolated from a group head and filter that is used for non-organic beans?
- Is the group head regularly cleaned using an espresso machine cleaner that is a BFA Allowed Input or OMRI Listed?
- The final steps to produce an organic espresso are no less important than the rest of the process from cropping to roasting.
- That final step, the extraction of the espresso from the ground organic beans, should be performed with an espresso machine that has been cleaned with a BFA registered or OMRI Listed espresso machine cleaner.

Evo®

Cafetto® Evo® is the first espresso machine cleaner to be certified by an organic certification body. It is the safe, high performance cleaner for professional espresso machines using organic coffee.

Cafetto® Evo® is OMRI Listed for use in organic systems.

Registered by the BFA for use with organic coffee.

Available in

125g jars (carton code 28144 - 12 jars)

500g jars (carton code 29160 - 12 jars)

1kg jars (carton code 29120 - 12 jars)

Tevo Tablets

Cafetto® Tevo is the first espresso machine cleaner to be certified by an organic certification body in tablet form. It is the safe, high performance cleaner for professional espresso machines using organic coffee.

Cafetto® Tevo is OMRI Listed for use in organic systems.

Registered by the BFA for use with organic coffee.

Cafetto® Tevo Mini is Registered to NSF standard P152.

Available in

Mini 60 x 1.5g tablet jars

(carton code 27839 - 12 jars)

Available in

4 x 25g sachets per box

(carton code 28303 - 12 boxes)

70 x 25g sachets

(carton code 14244 - 70 sachets)

1kg jars (carton code 27889 - 4 jars)

Grinder Clean

Completely food safe, 100% natural and gluten free, Cafetto® Grinder Clean cleans grinder burrs and casings as well as removing flavoured coffee odours.

Available in

40g sachet (carton code 27863 - 24 sachets)

450g jars (carton code 29760 - 12 jars)

Liquid Organic Descaler

A safe and effective liquid descaler for removing hard water scale from espresso machine boilers, coffee and milk delivery lines.

Available in

250ml bottles

(carton code 27434 - 12 bottles)

1L bottles with dispensing chamber

(carton code 25482 - 6 bottles)

5L bottles (carton code 26200 - 2 bottles)

Organic Milk Frother Cleaner

An organic liquid cleaner designed to remove milk residues from milk lines, frothers and parts on automatic espresso machines.

Available in

1L bottles with dispensing chamber

(carton code 27885 - 6 bottles)

Cafetto® proudly carries the following certifications:

NSF®

NSF (National Sanitation Foundation) International Protocol P152 relates to espresso machine cleaners that have been evaluated, tested, and passed NSF's stringent toxicology and corrosivity standards. The ingredients and formulation of the products that are NSF certified are safe, leave no harmful residues and do not cause corrosion within the coffee machine.

BFA Registered

All Cafetto® products marked with the BFA logo have been registered by the Biological Farmers of Australia and are approved for use in organic systems.

OMRI™ Listed

All Cafetto® products marked with the OMRI™ logo have been listed with the Organic Materials Review Institute as complying with the requirements of the National Organic Program.
